

YASMEEN AZMAT ALI

MSc Artificial Intelligence | AI/ML Engineer | Remote-Ready

📍 Sharjah, UAE | 📞 +971 50 371 1413 | ✉ yasmeenazmat.ali97@icloud.com

🔗 [LinkedIn](#) | 📁 [GitHub Portfolio](#)

PROFESSIONAL PROFILE

First-Class MSc Artificial Intelligence graduate (Ranked #1 in Program) with hands-on experience building real-time machine learning pipelines, NLP systems, and analytics dashboards. Proficient in Python, Apache Spark, Kafka, MongoDB, and Django. Passionate about deploying scalable AI solutions in remote, distributed teams. Seeking Remote AI/ML Engineering or Data Science Internship opportunities.

TECHNICAL SKILLS

Programming	Python · SQL · JavaScript
AI / ML	Machine Learning · Deep Learning · NLP · Model Evaluation & Deployment · Sentiment Analysis
Data Tools	Pandas · NumPy · Scikit-learn · Data Visualization
Big Data / Systems	Apache Spark (Structured Streaming) · Apache Kafka · MongoDB · REST APIs · Django
Dev Tools	Git · GitHub · Linux / Ubuntu · VS Code
Languages	English (Fluent) · Urdu (Native)

EDUCATION

MSc Artificial Intelligence — University of West London, UK (2024 – 2025)

- Graduated with First Class Distinction — Ranked #1 in MSc AI Program
- Dissertation: Cloud-Based Real-Time Twitter Sentiment Analysis using Apache Kafka & Apache Spark

Bachelor of Computer Science — Capital University of Science & Technology, Islamabad (2019 – 2022)

- Final Year Project: ML web application predicting pulmonary fibrosis progression (Django + Scikit-learn)

EXPERIENCE

AI Research Project — Master's Dissertation

University of West London | Jun 2025 – Sep 2025 | Remote-Compatible Research

- Architected a cloud-based, real-time Twitter sentiment analysis pipeline using Apache Kafka and Spark Structured Streaming
- Trained and deployed multilingual NLP sentiment classification models integrated into a live streaming workflow
- Built a live analytics dashboard for real-time monitoring using Django and MongoDB
- Designed scalable preprocessing, evaluation, and deployment pipelines for continuous, large-scale tweet data
- Project available on GitHub: Real-Time Twitter Sentiment Analysis System

Internship Trainer — Android & Software Development

TEGIC, Islamabad, Pakistan | Oct 2022 – Dec 2022

- Gained hands-on experience in Android development and collaborative software project workflows
- Assisted development teams with real-world application modules and debugging practices

KEY PROJECTS

Real-Time Twitter Sentiment Analysis System | MSc Dissertation | 2025

- End-to-end NLP pipeline: Kafka ingestion → Spark Structured Streaming → multilingual model inference → MongoDB → Django dashboard
- Processed large-scale streaming data with continuous, production-level sentiment analytics

Pulmonary Fibrosis Progression Detection System | Final Year Project | 2022

- ML-based web system predicting disease progression from medical imaging datasets
- Integrated trained Scikit-learn models within a Django healthcare platform with preprocessing pipelines

ACHIEVEMENTS & HIGHLIGHTS

- Ranked #1 in MSc Artificial Intelligence Program — University of West London
- Built production-level real-time AI analytics pipeline as part of dissertation research
- Strong GitHub portfolio demonstrating end-to-end ML/NLP project delivery

REMOTE WORK READINESS

Available for full-time remote internship roles globally. Comfortable with asynchronous workflows, version control (Git/GitHub), virtual collaboration tools, and independently delivering research and development tasks. UAE time zone (GST, UTC+4) — overlaps with EU and APAC working hours.
